

Joint Symposium 5

Oncology & Theranostics Committee / EAU

Monday, October 6, 16:45 – 18:15

Session Title

Advances in Renal Cancer Research

Chairpersons

Daniela Oprea-Lager (Nijmegen, Netherlands)

Jochen Walz (Marseille, France)

Programme

16:45 – 17:10 **Francesco Sanguedolce** (Barcelona, Spain): Diagnostics in Renal Cancer

17:10 – 17:30 **Karolien Goffin** (Leuven, Belgium): New tracers in Renal Cancer

17:30 – 17:50 **Stijn Muselaers** (Nijmegen, Netherlands): Girentuximab Imaging in Renal Cancer

17:50 – 18:15 **Elena Castro** (Madrid, Spain): Immunotherapy for Renal Cancer

Educational Objectives

1. To provide an overview of clinical unmet needs in Renal cancer
2. To learn about new tracers in Renal cancer
3. To understand the role of Immunotherapy in Renal cancer

Summary

Renal cancer is mainly an imaging diagnosis. Therefore, the multidisciplinary collaboration between urologists, imaging specialists including nuclear medicine physicians and medical oncologists is mandatory. In this joint session EANM-EAU the most important aspects related to the diagnosis of renal cancer will be discussed. An overview of promising new imaging tracers will be provided. Finally, the therapeutic approaches, including theranostic agents and immunotherapy will be presented.

Key Words

Renal Cancer; Molecular Imaging; Radiotracers; Immunotherapy
