

Joint Symposium 2

Neuroimaging Committee / EAN

Sunday, October 5, 15:00 – 16:30

Session Title

Who is the Right Candidate for Epilepsy Surgery?

Chairpersons

Eric Guedj (Marseille, France)

Roland Wiest (Bern, Switzerland)

Programme

- 15:00 – 15:30 **Ekaterina Patariaia** (Vienna, Austria): Presurgical evaluation: Clinical Decision-Making Beyond Imaging
- 15:30 – 16:00 **Roland Wiest** (Bern, Switzerland): The role of presurgical conventional and advanced MRI in epilepsy
- 16:00 – 16:30 **Donatienne Van Weehaeghe** (Gent, Belgium): When is SPECT and PET recommended in epilepsy?

Educational Objectives

- To gain insight and understanding of patient with lesional and non-lesional epilepsy and their selection for potential surgery
- To gain insight and understanding of established and future MRI techniques needed in the context of presurgical epilepsy diagnostics
- To gain insight and understanding of established and future SPECT and PET nuclear medicine techniques
